God and Evil in an Open Universe

Prof. Dr. Thomas
Jay Oord

in conversation with

Dr. Andreas Losch
and

Dr. Johannes Grössl

In his latest book, the US-American theologian Thomas Jay Oord claims no less than to have solved the problem of evil. This presupposes a very specific concept of God and his relationship to the world and man. How compatible is this with Protestant (Andreas Losch) and Catholic (Johannes Grössl) theologies, but also with science?
